01 COMPLETED PROJECT

The Titanic

14-minute film · 4K · 16:9 · Solo production · 2026

A time-traveling young woman boards the Titanic in Southampton, April 1912, and films her journey like a vlog: the Grand Staircase, first-class dinner, nights on deck, life in third class, and finally the night of the sinking. The tone moves from wonder to loss, and the film ends on what was left behind.

MY ROLE

- Concept, story structure, and script
- Character and scene design, image and video generation
- Keeping one lead character consistent across 20+ scenes
- Music, subtitles, and the full edit

TOOLS

GPT Image 2 — Characters & scenes → **Seedance 2.0** — Video generation → **CapCut** — Music & editing

Watch the full film
Full 14-minute film · youtu.be/3UTPcsP1dyQ

01 THE TITANIC · SELECTED FRAMES

From boarding day to the last morning

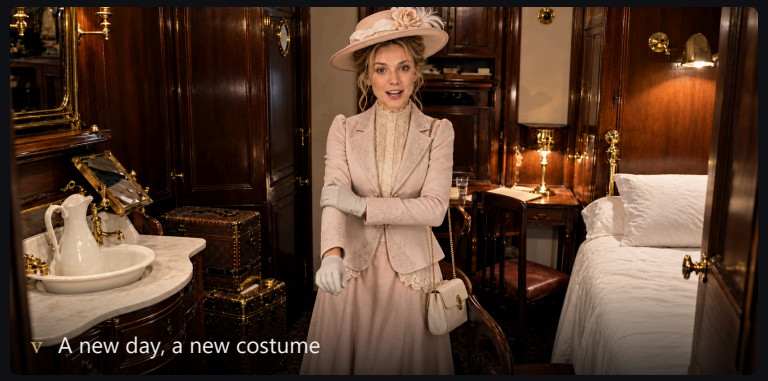

i Boarding in Southampton

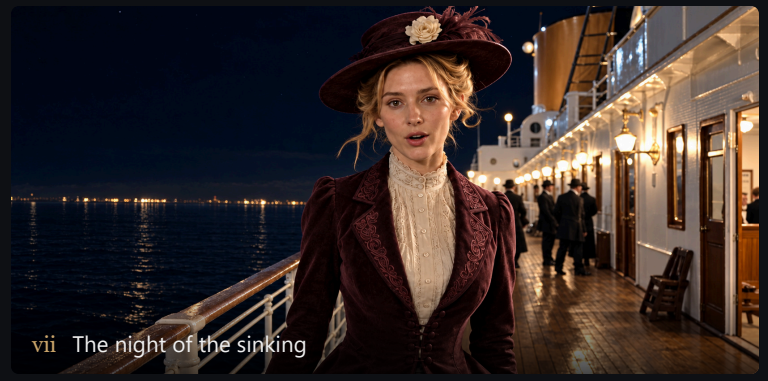

ii The Grand Staircase

iii First-class dining saloon

iv First night at sea

v A new day, a new costume

vi Life in third class

vii The night of the sinking

viii Lowering the lifeboats

ix Watching from the lifeboats

01 THE TITANIC · CHARACTER CONSISTENCY

One character, three costumes, 20+ scenes

The same face carries the whole film across different lighting, costumes, and camera distances, so the audience follows one person from start to finish.

Boarding day · navy coat

Second day · cream suit

Last night · burgundy coat

WORKFLOW

1. **Story & script**
   Research the real voyage, outline the journey, and write the narration scene by scene.

2. **Character & costume references**
   Create the lead character and her three costumes as fixed reference images.

3. **Scene images**
   Generate each scene in GPT Image 2 from the references: locations, extras, lighting.

4. **Video generation**
   Animate scenes in Seedance 2.0, regenerate shots that break the character or the action.

5. **Edit & finish**
   Assemble in CapCut with music, subtitles, and pacing from wonder to loss.

02 DEMO PROJECT

The Cleaner

Vertical short drama | 1:48 · 9:16 | English dialogue | Solo production

A billionaire grandmother returns after ten years, disguised as a cleaner at her own 70th birthday, to see who in her family deserves her fortune. Her family humiliates her in front of every guest; only one girl helps her. Then the lawyer bows to the cleaner, and in the last seconds the girl who helped turns out to be playing everyone.

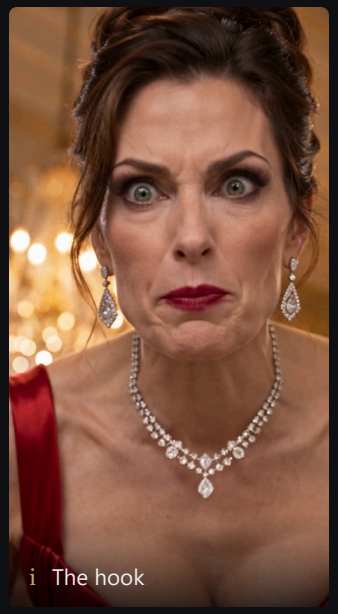

MY ROLE

- Story written for retention: conflict on the first frame, escalating humiliation, a slow reveal, a twist for Part 2
- Character sheets for five characters, location references, one storyboard per clip
- Six video clips with locked voices and lip-synced dialogue
- Edit, pacing, subtitles, and music

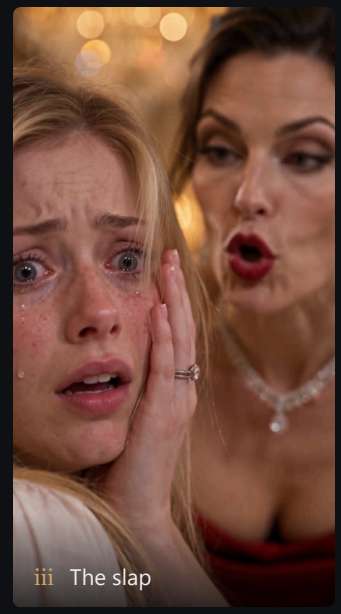

TOOLS

GPT Image — Sheets, boards → **Seedance 2.5** — Video & voices → **CapCut** — Editing

Watch The Cleaner
1:48 vertical film · youtu.be/jHuzFMbeNHQ

i The hook

ii Wine over her head

iii The slap

iv "Crawl for your money"

v The reveal

vi Payback

vii The twist

viii Did she know?

03 DEMO PROJECT

The Wolfless Bride

Vertical short drama | 2:39 · 9:16 | English dialogue | Solo production

Elena, the one daughter born without a wolf, runs barefoot through the forest to escape a forced marriage to the fire wolf. Her sister Clara, the heir, hunts her down on a white wolf with guards and black wolves. Cornered on a sea cliff, Elena jumps, and a chain in her mother's hand stops her fall: if she dies, who will marry him for Clara?

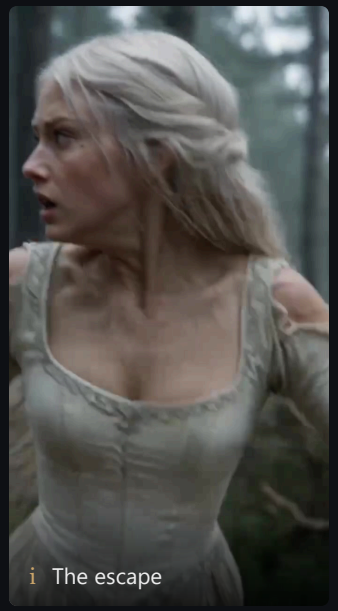

MY ROLE

- Story built as one continuous chase: forest, cliff, the jump, and a cliffhanger for Part 2
- Consistent looks for four characters, the wolves, and the guards across two locations
- Action shots: running chase, wolf riding, a fall caught by a chain
- Lip-synced English dialogue, edit, pacing, subtitles, and music

TOOLS

GPT Image — Characters & scenes → **Seedance 2.5** — Video & voices → **CapCut** — Editing

i The escape

ii The heir on the white wolf

iii The hunt

iv "I'd rather die"

v The jump

vi Caught by the chain

vii The mother

viii Taken back

04 COMPLETED PROJECT

The Last Alive

3:38 cinematic short · 2.33:1 widescreen · Solo production · 2026

A shot-by-shot AI recreation of MX-Shell's *Zombie Scavenger*, matched segment by segment. A cowboy-styled scavenger treats the zombie apocalypse like a holiday: he fights through a ruined Los Angeles, dances at a coastal villa, adopts an ostrich, and falls for a shop mannequin — until a rocket carries them both into orbit.

MY ROLE

- One lead kept consistent across the whole film — street fights, beach, villa, boutique, diner, park and spacecraft, in day, sunset and night light
- Supporting cast locked the same way: the ostrich, the bikini zombie, and the mannequin in her red polka-dot dress
- Action and comedy staging: a theatre-district zombie fight, a seagull dropping a severed head, a poolside dance, a rocket launch at sunset; final edit, pacing and music in CapCut

TOOLS

GPT Image 2 · Nano Banana 2.1 — Characters & scenes → **Seedance 2.5** — Video generation → **CapCut** — Music & editing

> **Music:** "I Think They Call This Love" — Miss Lindy.

i The villa, and an unexpected delivery

ii Earth, from the capsule

i Los Santos, 2013

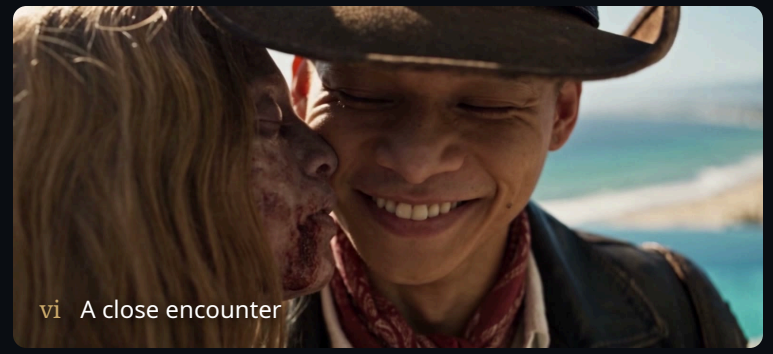

ii Showdown at the theatre

iii An unlikely companion

iv The villa above the beach

v A dance at the end of the world

vi A close encounter

vii Found in the boutique

viii A date, with an audience

ix Boarding the rocket at dusk

05 CURRENT PROJECT

NOAH: The Magic World

IN PRODUCTION · UNPUBLISHED

AI film series | 4 episodes | ~62 minutes | 2026

A four-episode fantasy film series built entirely with AI. The focus of this project is a production system that can keep characters, locations, and story continuity stable over a full hour of film, not just a single clip.

TOOLS

Seedream 5 Pro — Images → **Seedance 2.5** — Video → **CapCut** — Editing

The project is not public yet. Story documents, reference sheets, storyboards, and test takes can be shown during the interview.

PRODUCTION PIPELINE

1 Story
Message, treatment, episode breakdown, and a story map split into segments and beats.

2 World lock
Multi-angle face sheets, full-body costume sheets, and fixed location angles for every main character and set.

3 Shot design
Shot lists with varied shot sizes and angles, kept on the 180° line; one storyboard per take.

4 Continuity
A continuity log so the last frame of each shot matches the first frame of the next.

5 Prompts & test takes
Image and video prompts with clear reference roles; each result checked against the references.

6 Sound plan
Ambience, music, sound effects, dialogue, and silence planned per segment.

7 Review gates
Style guide, checklists, and a review step before every generation to save credits and avoid retakes.

8 Team board
A web board where the team reads the script and leaves comments on each scene.
